Value Explanations

Prices shown are retail consumer values and to be considered as selling prices. Trade-in and loan values are confidential for our dealers and industry base subscribers. Trade-in values are to be determined by local dealers and are generally lower than values shown.

Low Retail Value — low retail unit may have extensive wear and tear. Body parts may have dents and blemishes. The buyer can expect to invest in cosmetic and/or mechanical work. This vehicle should be in safe running order. Low retail vehicles usually are not found on dealer lots. **Low Retail should not be considered a trade-in value.**

Average Retail Value — An average retail unit should be clean without obvious defects. All rubber and cables should be in good condition. The paint should match and have a good finish. All lights and switches should work properly. The mileage should be within or slightly higher than the average range. This unit should also pass any emission inspection.
